- 20 ATM Water-Resistant
- Screw down crown
- Swiss Super-LumiNova hands and markers
- 45mm case
- Limited Edition - 200 pieces
- Warranty: 2 Year International

## SCREW-DOWN CROWN

Screw-down crowns are used to ensure water resistance. ALWAYS be certain that your crown is securely screwed down ( Position [0] is secured.

Positions [1], [2] and [3] are not secured for water resistance ).

Do NOT unscrew your crown while you are in any environment where moisture is present.

## HOW TO SET THE TIME

1. Unscrew the crown and pull it out to position [3]-(2nd click).
2. Turn the crown clockwise to set the correct time.
3. Push the crown in then screw it securely.

\* Take a.m./p.m. into consideration when setting the hour and minute hands to the desired time.

\* Always be certain that your crown is SECURELY SCREWED; this will prevent moisture from entering in.

## HOW TO SET THE DATE

1. Unscrew the crown and pull it out to position [2].
2. Turn the crown anti-clockwise to set the correct date.
3. Push the crown in then screw it securely.

NOTE: \* The date will change gradually between 9:00 P.M. and 4:00 A.M. Therefore, do not set the date during this time period or the date may not change properly. If it is necessary to set the calendar during that time period, first change the time to any time outside it, set the date and then reset the correct time.

## Water Resistance Guidelines

20 ATM - our watch is suitable for swimming, high-impact water sports and scuba diving.

NOTE: The crown must be fully screwed down to achieve the rated water resistance. Additionally, manipulation of the crown or buttons while the watch is in contact with water will negate the rated water resistance, as water penetration may occur.
